

FROM NOW ON

SALMONELLA SEROTYPING

IS FAST, ACCURATE, AND COST EFFECTIVE!

Biovet is proud to announce a new Salmonella Serotyping testing service

FAST

- Using the new xMap® salmonella serotyping kit developed by Luminex, Biovet can provide serotyping results of salmonella isolates **within 5 working days** instead of several weeks with the traditional agglutination method.

ACCURATE

- Provides identification of $\geq 90\%$ of the most commonly encountered salmonella serotypes
- More accurate and reproducible than the traditional agglutination method
- Can type rough and problematic isolates
- Allows the continuation of historical surveillance data analysis based on the traditional typing system

COST EFFECTIVE

- At very low cost per isolate for a result within a short delay
- Customers can save important time and cost
